

RITUAL OF ETERNAL DAWN

FINAL NOTATION · ARCHMAGISTER CORVEN · YEAR 0 P.R.

RESTRICTED

NOT TO BE COPIED · NOT TO BE REMOVED FROM ARCHIVE PREMISES
ACCESS: SENIOR ARCHIVISTS AND ABOVE · TIER IV CLASSIFICATION
SEALED DRAWER: SHELF 4-17-3

DECLARATION OF FILING

The following document was composed by Archmagister Corven on the night of the Ritual, Year 0 P.R., and deposited in the Sealed Archive by his own hand before the morning of Year 1 P.R. The document was transferred to Restricted Series CR-44 in Year 2 P.R. by order of the Provisional Authority. Its contents have not been reviewed by any serving Archivist since that transfer order was issued.

Three witnesses attested the original document at the time of filing. Their signatures appear below in the order they were given. The document was sealed with Corven's personal mark: a circle enclosing a small sun. The seal was intact at the time of the cover sheet addition in Year 23 P.R.

This cover sheet was added in Year 23 P.R. by Archivist Lenn, on discovery that the original filing lacked a public index entry. The contents of CR-44-09 were not examined at that time. The decision to leave the seal intact was recorded and signed at Senior Archivist level. A note in the restricted index reads: "contents unknown — do not open without authorisation."

WITNESSES AT FILING

CORVEN

bold. deliberate.

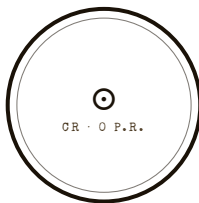

SALI

precise. even.

WREN

rushed. ink pressed hard.

In the order of our signatures. In the order we understood.

RESTRICTED SERIES — RELATED DOCUMENTS

- CR-44-09 Ritual notation, primary (this document)
- CR-44-11 Corven correspondence, pre-ritual
- CR-44-17 Corven correspondence, post-ritual
- AST-48-Y Astronomical registry, Year 48 projection

All items listed above are held in the Sealed Drawer, Shelf 4-17-3. Do not open without Tier IV authorisation and a second witness.

ANCHOR POSITIONS · CIRCUIT LAYOUT · FOCAL GEOMETRY · YEAR O P.R.

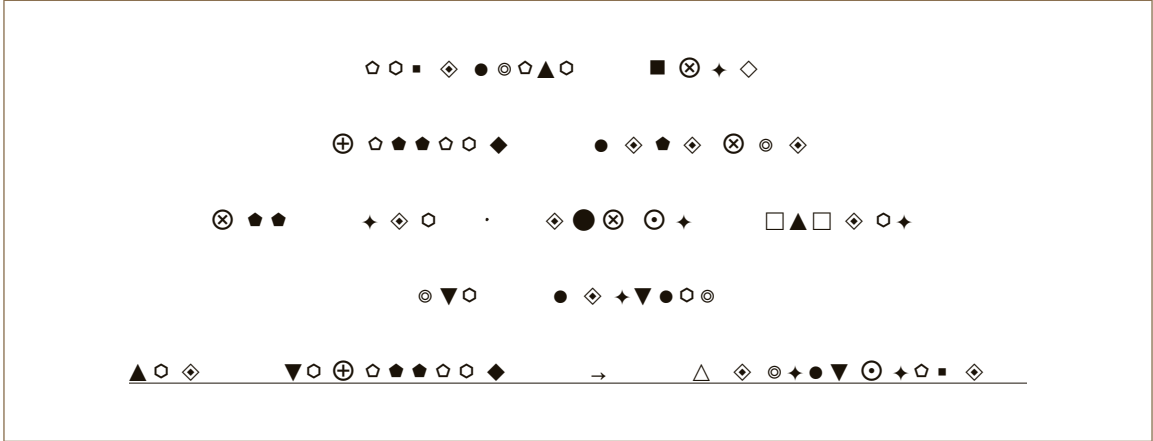

Primary anchor — Dawnmark star position (I, III, V, VII, IX) Secondary anchor — Dawnborn vessel (II, IV, VI, VIII, X)
Pentagram — Dawnmark star alignment (circuits I-III) * Dawnmark constellation node

Italic annotations in darker ink were added after the ritual in a different hand. The word "dwells" appears three times in these additions.
CR-44-09 · YEAR O P.R. · RESTRICTED · VARENHOLD ARCHIVE · PAGE 2 OF 3

CENTER NOTATION FROM FIGURE I — CORVEN'S CIPHER

Encoded in Corven's private notation system, Sections I, II, and III. Requires the complete Notation Key to decode. The last line is underlined in the original.

The final line is not a warning. It is a specification. The mechanism does not permit a third outcome. The underline is in Corven's hand. — added in different ink, same annotating hand as Figure I.

COMPLETION MECHANISM — TWO PATHS

PATH A · WILLING RELEASE

- All ten anchors present at the focal point (the Ashring)
- Exact moment: 02:14, Dawnmark overhead
- Each vessel releases willingly
- Third circuit closes inward
- Energy returns through focal point

Sun Returns

PATH B · FORCED OR INCOMPLETE

- One or more unwilling, absent, or coerced
- Circuit closes — opposite direction
- Inversion. Energy disperses outward.
- Irreversible once initiated

Destructive Inversion

"Willing release is not the same mechanism as forced release. This is not a philosophical observation. It is an engineering specification." — margin addition, Corven's hand, later date. Blue-black ink.

ASTRONOMICAL TIMING

The Dawnmark rises when the anchor holds. The five primary anchor positions (I, III, V, VII, IX) correspond to the five stars of the Dawnmark constellation: Warden's Star, Pale Fisher, Shepherd's Eye, Vael's Crown, and Trailing Light. These positions are fixed by the original ritual structure. They cannot be changed, moved, or substituted.

The constellation reaches the required overhead position at 02:14 on the date projected as Year 48 P.R. The Pale Fisher rises first. The Trailing Light sets last. Order matters.

CORVEN'S NOTES — PAGE 3 (RECOVERED FROM RESONANCE BOX)

The anchors are not lost. The light did not die. It redistributed into ten living vessels born at the moment of inversion. The ritual is incomplete, not failed. The completion requires their release.

The mouse survived. The mouse is not the same mouse. — not Corven's hand. Added later, in a third hand.

No one should be forced.

[This line appears alone on the fourth page. No other content. The paper is otherwise blank.]
