

Concordance Field Report – IRONBELL-7 (found in tannery back room)

Found in a sealed document sleeve in the tannery's back room – same desk as Fragment 3, or in the Dusk Priest's satchel. This is a prop the players find and read – not a player handout in the usual sense, but print it and place it on the table when they search. Players must cross-reference with documents they already have to extract the full picture.

[A folded field report, written in a precise, clipped hand. Official faction letterhead: a sealed door, inverted. The ink is fresh.]

CONCORDANCE OF THE WITHDRAWN – FIELD REPORT

Designation: IRONBELL-7 Filed by: WATCHER-1

Status: ACTIVE – DO NOT ARCHIVE

OBJECTIVE SUMMARY

Primary: Locate ASSET IX before SUNRISE-4 makes contact.
Secondary: Recover CORVEN-LOCK. Fragment III now in hand.
Ritual diagram decoded. Full Inversion Path confirmed.

ASSET IX – STATUS: HOSTILE-UNCONTACTED

Last confirmed sighting: Ashring Third Lane, north end.
Previous approach (Weeks 12-14) failed. Asset refused contact.
Asset is aware of the circuit requirement. Asset is using this.
Note: IX is the only position that can close the circuit willingly. Coercion closes it the other way.
We do not have a counter.

SUNRISE-4 – STATUS: MOBILE, UNAWARE

Not yet confirmed to know IX's location.
Unknown party accessed Archive-Box (Week 19).
Assess as SUNRISE-4 associates or rival collection.
Either case: accelerate timeline.
Do not allow SUNRISE-4 to reach IX.
If IX consents for them instead of us – objective fails.

RECOMMENDATION: Priority shift to SUNRISE-4 interdiction.
Current orders: hold SUNRISE-4 at IRONBELL. IX secondary.
